SKILLS

HTML | **CSS** | **Javascript** | **Tailwind css** | **Bootstrap** | **Git&Github** | **TypeScript** | **React Js** — react basic & react hooks & react redux | **Next Js** | **Zustand** — for state management

EXPERIENCE

MG Company, Front End Developer — Jan 2023 – present, Ismailia, Egypt

Collaborated with a team to develop an **ERP system** using **React.js** and **Tailwind CSS**.

MFB Automation, Internship - Front-End Developer — 10th of Ramadan City, Egypt

PROJECTS

Construction Company Task Management System

- Developed a real-world project for a construction company, collaborating with a team to build a comprehensive **task management system**.
- The system included a **user-facing interface** and a **complete administrative dashboard** to streamline task assignments, monitor project progress, and manage employee schedules.
- Utilized **React.js** and **Tailwind CSS** to create responsive and interactive UI components, ensuring a smooth user experience across devices.
- Integrated with a real backend API to handle data management and implemented role-based access control for different user permissions.

My Personal Portfolio

- Developed a fully responsive portfolio using **React.js** and **Tailwind CSS**, featuring dark mode support, smooth animations with Framer Motion, dynamic project data fetched from a custom API, modern sliders with Splide, and an interactive contact form integrated via Formspree for seamless communication.

Full-Stack Social Media Platform

- Built a feature-rich social media website with functionalities such as creating, deleting, and editing posts, commenting, and dedicated user profile pages. Integrated dark mode and protected routes to enhance user experience and security.
- Utilized **Next.js** and **Tailwind CSS** for a dynamic front-end, along with **Formik** for efficient form management, and **Shadcn UI** to deliver an interactive and polished interface. Implemented secure authentication using real backend APIs to ensure robust data handling.

movie app

- Built a movie website using **React.js** and **Tailwind CSS**, leveraging the TMDB API to display comprehensive information for each title, including individual detail pages for movies and TV shows, with a focus on creating a user-friendly and efficient UI to ensure smooth navigation and optimized performance across all devices.
