Fueled by a passion for cutting-edge technology and a relentless pursuit of excellence, I specialize in crafting dynamic, visually stunning web applications that leave a lasting impact. Ready to harness innovation and drive transformative digital experiences with unwavering precision.

Next Js

Oct 2020 – Jul 2024 | ismailia, Egypt

I started working in the company to create an ERP system to manage all the company's tasks, and I continue to work with them

Projects

ERP System, I worked on an enterprise resource planning system in which I used React JS and Tailwind CSS. I worked on fetching and using data on the site using Axios and I used React Hooks to make the site faster and better performance [↗](#)

My Personal Portfolio, coded using React.js , Tailwind CSS, Dark mode support & fully responsive all my projects fetched dynamically from API, contact me form made using Formspree, Splide package for slides & Framer Motion for animations.

Social Media Website, advanced social media website which have any basics in any social website like authentication and get post and make a post, comment, personal profile , other profiles , i made it with the Basics Html,Css,js and tailwind css [↗](#)

movie app, In this website I use tmdb for api i made it with reactjs and tailwind css to make the ui friendly and more efficient and i made it with any film or tv have a details page. [↗](#)
